the world increasingly relies on groundwater resources for drinking water and the provision of food for a growing population the utilization of aquifer systems also extends beyond freshwater supply to include other resources such as heat extraction and the storage and disposal of substances unlike other books about conflict resolution and negotiations over water resources this volume is unique in focusing exclusively on conflicts over groundwater and aquifers the author explores the specific challenges presented by these hidden resources which are shown to be very different from those posed by surface water resources whereas

surface watersheds are static groundwater boundaries are value laden and constantly changing during development the book describes the various issues surrounding the governance and management of these resources and the various parties involved in conflicts and negotiations over them through first hand accounts from a practitioner skilled in both process and substance as a groundwater professional and professional mediator the book offers options for addressing the challenges and issues through a transdisciplinary approach

winner of the writers league of texas book awards finalist for the j anthony lukas book prize from the front lines of the fracking debate a field philosopher explores one of our most divisive technologies when philosophy professor adam briggle moved to denton texas he had never heard of fracking only five years later he would successfully lead a citizens initiative to ban hydraulic fracturing in denton the first texas town to challenge the oil and gas industry on his journey to learn about fracking and its effects he leaped from the ivory tower into the fray in beautifully narrated chapters briggle brings us to town hall debates and neighborhood meetings where citizens wrestle with issues few fully understand is fracking safe how does it affect the local economy why are bakeries prohibited in neighborhoods while gas wells are permitted next to playgrounds in his quest for answers briggle meets people like cathy mcmullen her neighbors cows asphyxiated after drinking fracking fluids and her orchard was razed to make way for a pipeline cathy did not consent to drilling but those who profited lived far out of harm s way briggle s first instinct was to think about fracking deeply drawing on philosophers from socrates to kant but also on conversations with engineers legislators and industry representatives he develops a simple theory to evaluate fracking we should give those

at risk to harm a stake in the decisions we make and we should monitor for and correct any problems that arise finding this regulatory process short circuited with government and industry alike turning a blind eye to symptoms like earthquakes and nosebleeds briggie decides to take action though our field philosopher is initially out of his element joining fierce activists like texas sharon once called the worst enemy of the oil and gas industry his story culminates in an underdog victory for denton now nationally recognized as a beacon for citizens rights at the epicenter of the fracking revolution
